

E-mail Discussion Lists (Photo-3D and Others)

Edited from a posting by Linda Nygren

The photo-3d group is a community with a long history, starting as a listserv in the mid-1980's. It has moved several times and evolved from an email-only group to include a strong online presence, on Yahoo Groups (YG) for almost 20 years and now on the Groups.io (GIO) platform.

The main photo-3d group currently has about 2700 members, and the website includes archived messages dating back 20 years from the predecessor YG and eGroup. There are also subgroups (closed to new messages) that contain the message archives from many other 3D related groups previously on YG. On GIO, even nonmembers can read messages on most groups, but only members can post messages.

You can join any of the 3D group discussions at the group website below, or alternatively send a blank email to:

[Group Name]+subscribe@groups.io

(example: photo-3d+subscribe@groups.io) from the email account where you wish to receive messages. Subscriptions do need to be approved by a moderator (to help prevent spam), so be sure to look for and reply to the "pending subscription" notice you should receive. You will also need to reply to the separate email from groups.io that confirms your email address. You can set up a password for your groups.io account if you wish, or simply confirm your email periodically which will keep you signed in for 30 days each time. You can opt to receive individual emails or digests or summaries, or only Special Notices from moderators if you prefer to access and post online. Attachments (stored on the site) and uploads of photos and files are permitted.

At the 3D-Con (National Stereoscopic Association Convention) in August, there were many kinds of stereo photography interests represented. Various online discussion lists were mentioned, *some* of which are listed below:

Photo-3D <https://groups.io/g/photo-3d>
for general discussions of stereoscopic 3D photography.

Sell-3D <https://groups.io/g/sell-3d>
for buying/selling/trading of 3D related items

SPM <https://groups.io/g/SPM>
for using the StereoPhoto Maker program to edit 3D images

Viewmaster <https://groups.io/g/viewmaster>
for View-Master discussions

3Dsalon <https://groups.io/g/3Dsalon>
for info about 3D stereo exhibitions

3Dtablets <https://groups.io/g/3DTablets>
for users of glasses-free 3D tablets and phones

3dvideo <https://groups.io/g/3dvideo>
for 3D stereoscopic video discussions

3d-stereoviewXchange <https://groups.io/g/3D-stereoviewXchange>
members share images as SBS pairs

APEC / DSEC <https://groups.io/g/APEC>
for the Amateur Photographic Exchange Club (mounted cards) and Digital Stereo Exchange Club (4x6 prints) stereoview exchange groups

StereoRealist <https://groups.io/g/stereorealist>
for users of Stereo Realist film camera systems

Fuji3d <https://groups.io/g/fuji3d>
user group for Fuji W1/W3

Samsung3d <https://groups.io/g/Samsung3D>
for users of twinned Samsung cameras

StereoDataMaker <https://groups.io/g/StereoDataMaker>
for users of SDM software to synchronize certain Canon cameras

Lumix3d <https://groups.io/g/Lumix3d>
for users of Panasonic 3D-1 camera and/or Panasonic 3D lens

VR3D <https://groups.io/g/VR-3D>
for 3D virtual reality discussions

See you on the groups! -Linda Nygren
